In a time of two thousand years, a city has survived thanks to its heroes. Because the people of the city trust only those who can distinguish truth from lies, people will become more suspicious if they see your face moving from shadow to shadow. However, do you really look suspicious or is someone following you? It is a first-person psychological horror game where the player will notice subtle clues to survive. About the Characters Valentina: Valentina is a realistic character with very little visible dialogues and a minimal background story. She is trying to follow clues in order to find her mother and sister, who she desperately seeks help for. She is a very naive character who can easily be influenced by others' lies. She is a smart and determined young woman with a dark past. She always expected bad things to happen to her family, and she is now desperate to find them and figure out what happened. About The Game The Sword and The Stone: The Sword and the Stone is a dark parody of numerous medieval tales, where the game will force the player to use their brain to overcome various challenges. It is a puzzling adventure that will force the player to pay attention to details in order to survive long enough to discover the truth. The game can be played solo, or cooperative with a second player. The second player will have to use his hands to manipulate his own character as well as controlling the second player's character from the second player's perspective. About the Co-op: The player will work together on many challenges, where players will use each others' advantages and make each other's life easier through strategy. Some of the obstacles won't be as simple as just walking in the city. The game contains many challenges, puzzles and items that will make the player question their morals and help them make a choice to survive. A good strategy could be to help someone else and in return you'll be able to live longer. All items in the game are only available to the player who controls the character. About the Enemies: Players will not only have to deal with the usual dangerous enemies, but also with the more diverse and unusual enemies. Some of them are afraid of the sun or sound. Some are not afraid of death. Some are even afraid to even touch a human. All of them could be a deadly threat and players could easily find themselves fighting, running, hiding or blackmailing them in order to survive. About

"A unique arcade racer deserves a unique soundtrack." The Inertial Drift OST is a collaboration between UK broken beat legend Kaidi Tatham and NI electronic artist Kab Driver. Inspired by cult 90s arcade racers but spun out with contemporary production techniques and a distinct jazzy soul - it transports you to a 90s retro-future where the cars are fiercely individual, the tracks are demanding and your opponents are ruthless. The game oozes attitude, style, and a world of arcade racing nostalgia. Stay tuned for further tracks to be released in coming months. Features:

- Spectacular levels set across strange, dangerous and surreal worlds.
- Unique futuristic cars designed from the ground up for this unique experience.
- An incredible cast of nasty, self-serving opponents.
- A soundtrack of classic arcade beats matched with blissful new beats.
- Lo-fi trip hop visual style.
- Boss battles to show who's the best in the slipstream.
- Unique, hand-crafted retro-futuristic music composed and performed by Kaidi Tatham (NDMC) and Kab Driver.
- 40 custom tracks across 6 worlds to experience.
- Career mode. Race on your own time, or compete against players around the world in online multiplayer.
- Race on special modes, or just go for a test drive.
- Experience something fresh in the slipstream.
